

Open anaconda prompt

*First time

```
conda create --name viz python=3.9 (*viz – environment name)
```

```
conda activate viz
```

```
pip install streamlit pandas numpy seaborn matplotlib openpyxl xlrd scikit-learn
```

```
cd C:\Users\Utilizador\Desktop\visualization (path to folder with run_app.py inside – might need to give an email)
```

```
streamlit run run_app.py
```

*Following times

```
conda activate viz
```

```
cd C:\Users\Utilizador\Desktop\visualization (path to folder with run_app.py inside)
```

```
streamlit run run_app.py
```
